

Fentrim F – External Flashing Tape

The black, fleece-backed flashing tape Fentrim F is the ideal flashing solution for jobsite conditions where mixed substrates are present.

Primer is not required, even for masonry, and the aggressive acrylic adhesive bonds in the most difficult temperature conditions. A tear-proof, split-release liner allows fast and error-free results...every time.

Fentrim F removes the need for custom made flashings. It reduces cost from damage on site and delays due to incorrect manufacture.

Available Sizes:

100/150/270/300mm x 25m

SIGA tapes are Airtight, Weathertight and Diffusible. Uniquely, they are also VOC free.

No off-gassing means no deterioration of product capability over time and better internal air quality, which is so important for Passive House and High Performance Builds.

Your advantages

- ✓ high adhesive strength at high and low temperatures easy to apply, immediately 100% tight
- ✓ robust, fleece-backed carrier material reliable, long-term building value
- ✓ no primer required for masonry saves time, eliminates process mistakes

It's as easy as 123! You will be a SIGA expert in no time at all!
