

Primur – Specialised adhesive compound for mounting internal membranes

Primur is specified for airtight bonding of vapour control layers to plastered masonry and other massive structures (e.g. concrete, wood). No supporting lath is required as the high-performance adhesive compound is durably adhesive and elastic.

Image shows Primur being laid via cartridge carrier to hard substrate for airtight bonding of Majpell membrane.

SIGA tapes and compounds are Airtight, Weathertight and Diffusible. Uniquely, they are also VOC free. **No off-gassing** means no deterioration of product capability over time and better internal air quality, which is so important for Passive House and High Performance Builds.

Available Size:

Tape – 12mm x 4mm x 8m

Cartridge – 310ml

Sausage – 600ml

Your advantages

-
- ✓ durably elastic, reliably absorbs structural movements
 - ✓ durably self-adhesive, no supporting lath required
 - ✓ solvent-free, unlimited durability, resistant to ageing
