

MAJCOAT, Majcoat SOB (Siga adhesive strength On Board) – For the Roof & Wall

Majcoat is Europe's leading external weatherproof roof and wall membrane. The driving rain-proof and diffusion-open breathable membrane Majcoat is specified for creating a permanently windtight building envelope.

It can be used for wall and between and above-rafter insulation and rear-ventilated facades.

Dual purpose application means that the builder on site does not have to stock separate membranes for wall and roof.

MAJCOAT 150 / 190 / 200

For those demanding applications specifying a lighter and higher diffusible roof membrane, Majcoat 150 is the solution. It is available in 1.5 and 3m rolls and with SOB.

For Heavy duty applications specify 190 or 200.

Majcoat SOB Even easier, even faster:

Underlays can be applied even more easily with Majcoat **SOB** because the membranes overlap and have an integrated twin adhesive zone. This can save vital time on site. It is also imprinted with time-saving accurate cutting and bonding guidelines. This makes Majcoat SOB even easier to handle and faster to install.

SIGA products are Airtight, Weathertight and Diffusible. Uniquely, they are also VOC free.

No off-gassing means no deterioration of product capability over time and better internal air quality, which is so important for Passive House and High Performance Builds.

Majcoat complies with the requirements of ZVDH

Complies with the ZVDH product data sheet Breathing membranes class UDB-A according to table 1

- Suitable for makeshift coverage for house structure
- Suitable SIGA accessories: Wigluv, Primur Roll, Nail sealing tape
- Suitable for use as roof membrane class USB-A

Combining Majcoat with the vapour control layer Majpell (s_d value=5 m) ensures perfect moisture transportation with a diffusion gradient of 1:50.

Driving rain resistance of Majcoat and SIGA accessories has been proven by the TU Berlin.

Your advantages

- ✓ imprinted cutting and bonding aid saves time
- ✓ 3 layers, functional layer protected by 2 fleeces
- ✓ resistant to driving rain and durably moisture-diffusing
- ✓ sturdy and tear-proof
- ✓ no damage in construction phase
