

## PRODUCTS –

### External applications

#### **Majvest** - Membrane For the Walls

Majvest is Europe's leading external weatherproof membrane and provides for permanently airtight and weathertight facades on the exterior. Majvest is highly tear-proof and flexible, so it is easy and secure to lay. The material is permeable and permanently protects the internal wall construction from condensation build-up.

It is available in 1.5m or 3m width rolls and is imprinted with time-saving accurate cutting and bonding guidelines. This makes Majvest application on site very efficient and quick.

SIGA products are Airtight, Weathertight and Diffusible. Uniquely, they are also VOC free.

**No off-gassing** means no deterioration of product capability over time and better internal air quality, which is so important for Passive House and High Performance Builds.

#### **Available sizes: 1.5m & 3m x 50m**

#### Your advantages

---

- ✓ 3-layer, tear-proof and flexible
- ✓ can be laid easily, quickly and securely with cutting and bonding guidelines
- ✓ saves time for all closed facades
- ✓ for all-purpose external application

It's as easy as 123! You will be a SIGA expert in no time at all!
