

TWINET — Specialised tape for mounting internal membranes

The double-sided adhesive assembly tape Twinet is specified for the pre-installation of vapour control layers on hard substrates, e.g. metal or wood.

Image showing the quick installation of vapour control layers without the need for mechanical fastening such as a stapler.

During roof renovation from the outside, the vapour control layer can be easily, quickly and reliably installed and airtightly sealed at the base of the rafter with Twinet.

100% VOC FREE - ONLY WITH SIGA!

SIGA tapes are Airtight, Weathertight and Diffusible. Uniquely, they are also VOC free.

No off-gassing means no deterioration of product capability over time and better internal air quality, which is so important for Passive House and High Performance Builds.

Available Size: 20mm x 50m.

Your advantages

- ✓ extremely adhesive on both sides, quick, safe installation without stapler
- ✓ protective coating prevents soiling, simple to apply up to the end
- ✓ tearproof backing strip, saves time

Suitable substrates

- Wood
- Hard wood-based panel materials
- Metals
- Hard plastics

It's as easy as 123! You will be a SIGA expert in no time at all!
