

FENTRIM 20 & IS20 – Internal Use

100% VOC FREE! - ONLY WITH SIGA!

The white coloured, single-sided high-performance adhesive tape Fentrim 20 is the optimal solution for permanent airtight bonding of window and door frames in **solid construction from the inside**.

It comes with a perforated edge zone for internal plastering. This is handy where for example a square set finish to the reveal may be specified.

Available Sizes:

Fentrim 20

100/150/200 mm x 25m and pre-folded 50/85mm

IS20 comes without the perforated zone

100/150/200/250/300mm x 25m

SIGA tapes are Airtight, Weathertight and Diffusible. Uniquely, they are also VOC free.

No off-gassing means no deterioration of product capability over time and better internal air quality, which is so important for Passive House and High Performance Builds.

Your advantages

- ✓ extremely high adhesive power on entire surface, easy to apply, immediately 100% tight
- ✓ 15 mm prefolded, without backing strip, fastest bonding contact at window frame
- ✓ non-woven with perforated zone suited for plastering-over, strong plaster adhesion on masonry

It's as easy as 123! You will be a SIGA expert in no time at all!
